

STEP 04

The Sales Funnel

Funnel Architecture & Copy Brief — Build a conversion machine, not a website.

A website is a brochure. A sales funnel is a system. Where a website converts at 1–3%, a TRN Sales Funnel converts at 5–10% — because every element exists for one purpose: to move the visitor to the next step. This form captures everything TRN needs to design, write, and build your funnel.

The 3-Step TRN Funnel: Sales Landing Page → Qualifier Pop-up → Thank You Page → CRM → Sales Team. No navigation menu. No distractions. One offer. One CTA. One path.

SECTION A

Funnel Goals & Context

Which offer does this funnel lead with?

From Step 03 — Free/Low Risk offer name

Funnel goal (primary action):

e.g. Book a call / Download resource / Submit enquiry

Target landing page conversion rate:

TRN benchmark: 5–10%

Target monthly leads from this funnel:

e.g. 25 leads/mo

Who is the existing website / online presence? (URL if available)

We build the funnel separately — this gives us brand/design reference.

Does the client currently have any funnel or landing page? Describe:

e.g. 'No funnel exists' / 'Have a Leadpages page but not converting'

Funnel platform / builder preference:

☐ TRN recommended (ClickFunnels / GoHighLevel)

☐ WordPress / Elementor

☐ Unbounce

☐ Webflow

☐ Shopify (e-commerce)

☐ Client to advise

SECTION B

3-Step Funnel Architecture Brief

Complete the copy and content brief for each of the three funnel pages. TRN will use these inputs to write all copy, design all pages, and configure all integrations.

1

Sales Landing Page

Target: 5–10% visitor-to-lead conversion · No navigation · One CTA only

Headline (the single most important line — must match the ad):

e.g. 'Stop Wasting Ad Spend. Get 10 Qualified Leads in 30 Days — Guaranteed.'

Sub-headline (expand on the promise — what do they get?):

e.g. 'Book your free Missed Revenue Audit and walk away with a plan to fix your lead pipeline.'

Primary pain point the page leads with:

Pulled from Step 01 Persona — the #1 frustration your persona has right now

Bullet points — 3 to 5 outcomes the prospect will get (benefits, not features):

e.g. '✓ Know exactly which platform is wasting your budget' / '✓ See your hidden revenue leaks'

Social proof element to include on this page:

e.g. Client testimonial quote, number of clients served, key result stat

Primary Call-to-Action (CTA) button text:

e.g. 'Book My Free Audit' / 'Claim My Free Session' / 'Get My 10 Leads'

Form fields to collect on this page (keep minimal — more fields = lower conversion):

Recommended: First Name + Phone Number only. Add email if needed.

▼ Visitor submits form → Qualifier Pop-up triggers

2

Qualifier Pop-up

Purpose: filter bad-fit leads before they reach your sales team · BANT-based questions

Pop-up headline:

e.g. 'One quick question before we confirm your spot...' / 'Almost there — just 3 quick questions'

Qualifier Question 1 (Budget):

e.g. 'What is your monthly marketing budget?' — provide multiple choice options

Answer options for Q1:

e.g. 'Less than R5 000 / R5 000–R15 000 / R15 000–R50 000 / R50 000+'

Qualifier Question 2 (Authority / Role):

e.g. 'What is your role in the business?' — Business Owner / Director / Marketing Manager / Other

Qualifier Question 3 (Need / Timing):

e.g. 'When are you looking to start?' — Immediately / Within 30 days / 1–3 months / Just researching

What happens to DISQUALIFIED leads? (those who don't meet BANT criteria):

e.g. 'Redirect to a free resource / nurture email sequence / polite decline page'

What happens to QUALIFIED leads? (those who pass):

e.g. 'Redirect to Thank You page + notify sales team within 5 minutes via CRM'

▼ **Qualified lead confirmed → Thank You Page**

3

Thank You Page

Target: 5–10% inbound call rate · Reinforce trust · Drive immediate next action

Thank You page headline:

e.g. 'You're confirmed! Here's what happens next.' / 'Great choice — your spot is reserved.'

What is the immediate next step shown on this page?

e.g. 'Click below to book your exact time slot' / 'Your strategist will call you within 2 hours'

Calendar / booking tool to embed (if applicable):

e.g. Calendly / TidyCal / HubSpot Meetings / Manual call-back

Social proof / urgency element on this page:

e.g. 'Join 47 businesses already using The Lead Machine' / 'Only 5 spots remain this week'

Bonus / value-add to show on this page:

e.g. Link to a free guide / video / checklist while they wait for the call

Inbound call phone number to display prominently:

e.g. +27 (0)11 XXX XXXX — for the 5–10% who call directly from this page

SECTION C

CRM & Lead Flow Integration

Every qualified lead that completes the funnel must flow automatically into the CRM. This section defines how leads are handled from the moment they submit — connecting the funnel to Step 05 (The Sales Process).

CRM platform:

- ☐ TRN Custom CRM (GoHighLevel)
- ☐ HubSpot
- ☐ Salesforce
- ☐ Pipedrive
- ☐ Monday.com
- ☐ Client to advise / existing system

Who receives the lead notification when a qualified lead submits?

Name / role / WhatsApp number / email — this person must respond within 5 minutes

Target lead response time:

TRN benchmark: < 5 minutes

Notification method:

e.g. WhatsApp + Email + CRM alert

Automated follow-up sequence — which channels?

- ☐ WhatsApp message
- ☐ Email sequence
- ☐ SMS
- ☐ Phone call (manual)
- ☐ Retargeting ad
- ☐ All of the above

What does the first automated follow-up message say?

This fires within 5 minutes of the lead submitting. Keep it personal and direct.

Follow-up cadence — how many touchpoints and over how many days?

e.g. 'Day 1: WhatsApp + Email / Day 3: Follow-up call / Day 7: Final reminder email'

Lead Flow Summary:

STAGE	ACTION	WHO / SYSTEM	TIMEFRAME
1. Lead submits form	Qualifier pop-up fires	Funnel system	Instant
2. Lead qualifies	CRM entry created, sales team notified	CRM + WhatsApp alert	< 1 minute
3. First contact	Sales team calls / messages lead	Sales team	< 5 minutes
4. No response	Automated follow-up sequence triggers	CRM automation	Day 1–7

5. Lead disqualifies	Tagged disqualified, nurture sequence starts	CRM	Ongoing
6. Lead converts to sale	Deal closed, CRM updated, UTM source recorded	Sales team + CRM	Per deal timeline

SECTION D

Funnel Design & Brand Brief

The funnel must look like it belongs to the brand — but it is not a brochure. Provide enough direction for TRN to design pages that feel premium and convert.

Primary brand colour (hex or name):

e.g. #C9A84C / Gold

Secondary brand colour:

e.g. #0D0D0D / Black

Preferred font style:

e.g. Bold sans-serif / Clean minimal / Premium dark

Overall tone / feel:

e.g. Authoritative / Approachable / Luxury / Direct

Reference pages / designs you like (URLs or descriptions):

Competitor funnels, landing pages, or brands whose style resonates

Image / media style:

☐ Dark / bold (premium)

☐ Light / clean (professional)

☐ Lifestyle photography

☐ Corporate / formal

☐ Bold typography only

☐ Video background hero

Do you have a brand guidelines document or style guide?

Yes / No — if yes, attach or provide link:

SECTION E

Funnel Conversion Targets

Define your funnel performance benchmarks. These feed into the Step 06 Traffic Light Machine — any step that underperforms gets flagged and fixed in the next 90-day sprint.

FUNNEL STEP	METRIC	MONTH 1 BASELINE	TARGET (90 DAYS)	RED FLAG BELOW
Landing Page	Visitor → Lead conversion rate		5–10%	< 3%
Qualifier Pop-up	Lead → Qualified lead rate		20–30%	< 15%
Thank You Page	Qualified lead → Inbound call		5–10%	< 3%
CRM Response	Lead to first contact time		< 5 min	> 30 min
Sales	Qualified lead → Closed deal		20–30%	< 10%
Funnel Overall	Visitor → Closed deal rate		1–3%	< 0.5%

★ Month 1 Baseline column is filled in after the first 30 days of live data. Target column is what we optimise toward in the first 90-day sprint.

SECTION F

Tech Stack & Integrations

List all tools and platforms that need to connect to the funnel. TRN will configure all integrations before launch.

INTEGRATION	TOOL / PLATFORM	ACCOUNT EXISTS?	ACCESS PROVIDED?
Funnel / Landing Page Builder		☐ Yes ☐ No ☐ Need to create	☐ Yes ☐ No ☐ In progress
CRM System		☐ Yes ☐ No ☐ Need to create	☐ Yes ☐ No ☐ In progress
Email Marketing Platform		☐ Yes ☐ No ☐ Need to create	☐ Yes ☐ No ☐ In progress
WhatsApp / SMS Tool		☐ Yes ☐ No ☐ Need to create	☐ Yes ☐ No ☐ In progress

Booking / Calendar Tool		☐ Yes ☐ No ☐ Need to create	☐ Yes ☐ No ☐ In progress
Google Analytics / Tag Manager		☐ Yes ☐ No ☐ Need to create	☐ Yes ☐ No ☐ In progress
Google Ads Conversion Tracking		☐ Yes ☐ No ☐ Need to create	☐ Yes ☐ No ☐ In progress
Meta Pixel		☐ Yes ☐ No ☐ Need to create	☐ Yes ☐ No ☐ In progress
Payment Gateway (if applicable)		☐ Yes ☐ No ☐ Need to create	☐ Yes ☐ No ☐ In progress

SECTION G

Sign-Off & Next Steps

Any additional requirements, constraints, or notes for the funnel build?

Once this brief is approved, TRN will:

- 1. Write all funnel copy — headline, sub-headline, bullets, CTA, pop-up, Thank You page.
- 2. Design all three funnel pages — mobile-optimised, brand-aligned, zero distractions.
- 3. Configure the qualifier pop-up with your BANT logic.
- 4. Connect the funnel to your CRM, UTM tracking, and follow-up automation.
- 5. Set up conversion tracking in Google Ads and Meta Pixel.
- 6. Test end-to-end before going live — every submission, every notification, every redirect.
